RE: Letter of Intent and Non-Federal Cost Share Commitment for 2016 Pre-Disaster Mitigation

Dear Ms. White;

Through this letter the Town of Waterfield wishes to be considered for 2016 Pre-Disaster Mitigation Grant funding to update our Local Multi-hazard Mitigation Plan. Our current plan was approved on July 3, 2010 and expired on July 2, 2015.

In addition, we commit to providing a non-federal cost share of \$6,000 which is 25% of the total cost of the planning project we will undertake if awarded. The non-federal cost share will be comprised of town cash and staff time. A detailed budget is attached to demonstrate our proposed cost share.

Our community is committed to making our community more resilient from natural hazards and reducing our overall vulnerability. We will be addressing all of following hazards in our plan; Flood, Dam Failure, Coastal Hazards, Hurricane/ Tropical Storm, Nor'easter, Earthquake, Landslide, Severe Winter Weather, Wildland Fire, Severe Weather (thunder, lightning, high winds), Tornado, Drought, Extreme Temperatures, Tsunami. We focus on our hazards of greatest concern which are flooding, severe winter weather, and high winds. In our community our greatest vulnerabilities are to our floodplain areas and the development in the floodzone, like our DPW garage and town fuel tank as well as a number of business including an office supply store and grocery store. Additionally, we are vulnerable to roof collapses or structural failure during high wind or major snow and ice events.

In the past two years, the town has been doing public outreach to businesses and residents through our Know your Zone Education Series to provide information to those living and working in the floodplain. Throughout this project our community has gained support for hazard mitigation and momentum to continue with resilience activities.

The town of/city of is committed to implementing this planning process by utilizing the Waterfield Local Emergency Planning Committee (LEPC) headed up by our Emergency Management Director and Fire Chief, Bill Smith. This existing committee include a number of town department heads, the hospital, several hazardous materials facilities (Tier 2 facilities), Ambulance Service. We would also expand this group to include our neighboring communities

of Highland, Lowboro, and Dryfield; the Long River Watershed Collaborative, the Friends of the Long River, Waterfield CERT, OfficeStore, and the Greater Cities Chamber of Commerce. This group will meet every other month during the 24 month planning process in the late afternoons. The meetings will be posted according to open meeting law and notes will be available on the towns website. The public will be encouraged to attend all of the planning meeting, however two briefing to the Board of Selectmen will be held to reach a broader audience.

We hope that you consider our commitment letter for our Hazard mitigation Planning Update and include our community in the 2016 application to the Federal Emergency Management Agency for funding. We look forward to this opportunity.

Sincerely,

Michael Thomas

Board of Selectmen Chair

CC: Bill Smith, EMD/Fire Chief
Town Administrator
